HIPAtlanta Outreach Management Replication Logic Model

Goal: To support the OMS replication using evidence-based program models, innovation, linkage to testing services and PrEP providers or other associated sexual risk factors.

INPUTS

Funding
- CDC
- SAMHSA
- OMH
- Social Impact Funding
- In-Kind
- Other

Staff
- Grantee
- Evaluator
- Federal Project Officer

Training & Technical Assistance (T & TA)
- Programmatic T &TA
- Evaluation T & TA
- Annual Conference
- Developer T&TA

HHS TPP Evidence-Review
- List of evidence-based programs
- Implementation reports
- Educational materials on program models

HIPAA Accuracy Review

Evidence-based program
- Program materials
- Core components
- Adaptation guidance
- Evaluation tools
- Prior research

Implementation Sites
- Five Local CBO's(Pilot)
- Staff
- Space

Communications
- Website
- Mobile App
- Communication materials

Performance Measures
- Fed PM
- Data collection tools
- Reporting system

Rigorous Evaluation
- Independent evaluator
- Evaluation design & data collection instruments

ACTIVITIES

Planning Stage

- Determine target population

- Conduct needs assessment & identify program model to meet needs of target community

- Finalize work plan

- Establish & maintain management and administrative support systems

- Train all facilitators on program

- Pilot test program

- Receive Funding Source approval for proposed minimal adaptations

- Receive Funding Source approval for proposed add- on activities

- Establish & maintain MOUs with all implementation partners

- Develop implementation plan

Implementation

- Recruit participants

- Participate in Funding Source trainings

- Implement evidence-based program

- Maintain fidelity to the core components of the program

- Retain participants

- Provide referrals for teenage pregnancy prevention related health care services

- Collect performance measure data

- Disseminate evaluation results

- Use data to continuously improve program implementation

- Outreach to community about program

- Establish & maintain partnerships with relevant organizations in community

- Identify resources to enhance sustainability

OUTPUTS

Planning Stage

- Target population identified

- Needs assessment completed

- Work plan finalized

- Management & administrative support system in place

- Facilitators trained

- Pilot test completed

- List of approved adaptations

- List of approved add-on activities

- Age appropriate, medically and scientifically accurate materials

- Signed MOUs with all partners

- Implementation plan completed

- Rigorous evaluation plan

- Grantee staff trained

Implementation

- Target Pop's recruited to participate

- Fidelity monitoring tools in use

- Participants retained for program entirety

- Referrals for HIV prevention related Behavioral Interventions

- Performance measure data collected

- Outreach materials developed

- Partnerships in place

- Plan for identifying resources

Data Sources:
- Needs Assessment Report
- Data Accuracy Review Report
- Work plan
- Implementation Plan
- List of Approved Adaptations & Add-ons
- MOUs
- Evaluation Plan
- Annual Progress Reports
- Performance Measure Data

SHORT-TERM OUTCOMES
~ 1years

- Program planning completed and informed by:
   - Data on health risk behaviors
   - Needs assessment
   - Results of pilot
   - Fidelity monitoring data

Intervention Level
- Evidence based programs implemented with fidelity

- Retain % participants throughout entirety of program

Participant Level
- Increase participants who receive evidence-based programs

- Positively impact participant:
   - Perception of risk
   - Knowledge
   - Self-efficacy
   - Beliefs
   - Norms
   - Barriers

- Provide program participants with referrals for HIV, STD and PrEP prevention related health care services as appropriate

Grantee Level
- Increase number of Social Media presence and on evaluation findings

- Increase the number of strong partnerships with relevant organizations in the community

- Identify resources to support program sustainability

Data Sources:
- Annual Progress Reports
- Performance Measure Data
- Evaluation Reports to Funding Source

INTERMEDIATE OUTCOMES
~ 2-3 years

Participant Level
- Positively impact participant:
   - Perception of risk
   - Knowledge
   - Self-efficacy
   - Beliefs
   - Norms
   - Barriers

- Increase percentage of program participants who high risk for HIV, STD

- Reduce frequency of high risk behaviors among program participants

- Decrease number of sexual partners among program participants

- Increase percentage of program participants who consistently use condoms

- Increase percentage of program participants who use PrEP to prevent HIV infection

- Provide program participants with referrals for HIV prevention related health care services as appropriate

Grantee Level
- Increase number of publications and presentations on evaluation findings

- Enhance & expand program through strong partnerships

- Obtain additional resources to support program sustainability

Data Sources:
- Annual Progress Reports
- Performance Measure Data
- Evaluation Reports
- Evaluation Publications

LONG-TERM OUTCOMES
~ 4 or more years

- Reduce HIV infection among program participants

- Reduce Recurring testers testing + among program participants

- Reduce prevalence of STIs, including HIV, among program participants

Grantee Level
- Strengthen & sustain partnerships within the target community

- Increase number of publications and presentations on evaluation findings

- Program is sustained through additional resources & community partnerships

Data Sources:
- Evaluation Reports to Funding Source
- Evaluation Publications
